DETAILED ACTION

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

The information disclosure statement (IDS) submitted on 01/05/2004 has been considered by the examiner.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1-3 are allowed. The claims are allowed over the prior art of record that neither teaches nor fairly suggest the applicant's method of making an electrode active material containing specific elemental composition in specific ratios. The closest prior art by Kweon et al (US 6,372,385) teaches a method of making a composition with the formula LiA_{1-x-y}B_xC_y O₂ where 0.<.x.≤.0.3, 0 ≤.y.≤.0.01, and A is an element selected from the group consisting of Co and Mn; B is an element selected from the group consisting of Ni, Co, Mn, B, Mg, Ca, Sr, Ba, Ti, V, Cr, Fe, Cu and Al; and C is an element selected from the group consisting of Ni, Co, Mn, B, Mg, Ca, Sr, Ba, Ti, V, Cr, Fe, Cu and Al, by mixing the metal sources forming a mixture, first heat treating the mixture in air between 400-550C, a second heat treating the mixture in air between 700-900C and a final heat treating the coated mixture between 400-900C in air (Col-5, Ln 13-64). Applicant's instant claim limitation of heat-treating the component mixture between 1000-1100C in air is not obvious over the unexpected superior performance of the electrode material heat treated at 1050C with or without rebaking at 700C over an identical composition heat treated at 900C (See Specification, Data for Examples 1, 7 and comp. Example-4 in Tables 1-2 and 4 respectively).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 10/750,861

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to Kallambella Vijayakumar whose telephone number is 571-272-1324. The examiner can

normally be reached on 8.30-6.00 Mon-Thu, 8.30-5.00 Alt Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Douglas McGinty can be reached on 571-272-1029. The fax phone number for the organization where

this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be obtained from

either Private PAIR or Public PAIR. Status information for unpublished applications is available through

Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC)

at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative

or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-

1000.
